PECAN GRADES STANDARDIZED

Our pecans are machine graded for size, varying 1-8th of an inch in diameter so that the nuts in each grade are uniform in size and present a most attractive appearance, selling at sight.

After going through this size grading machine each grade is then put through a separator, which eliminates the poorly filled nuts from the perfect ones. This is virtually a weighing machine and we believe this is not only the newest addition to pecan machinery, but the most efficient as well.

The nuts of each grade being uniform in size, the number of nuts to the pound governs the grade in all varieties, excepting those oblong in form, as Schley, Van Deman, etc. These are also sized and weighed but not just the same as the large round nuts like the Success. The quality in the kernels is the same in all the grades.

We have now established our standard grades, which will be the same from year to year in number per pound, so that the customer may order by grade number and not be compelled to send for samples, as in re-ordering they receive the same weight and number of nuts to the pound, when calling for a certain grade or grades.

By these careful methods we are not only retaining our old customers but adding new ones wherever our standard of grading becomes known.

Grades 7, 8, and 9 represent grades 14, 16 and 18 of past year's list.

The number of nuts per pound is guaranteed as listed.

PRICES in 100 lb. lots and up F. O. B. ^{your} ~~this~~ station.

SUCCESS

Grades	Price per lb.
7 ----- 66 to 73 Nuts to a pound	38 Cts.
8 ----- 48 to 55 Nuts to a pound	45 Cts.
9 ----- 38 to 44 Nuts to a pound	70 Cts.
Specimen ---- 33 to 36 Nuts to a pound	1.00 Cts.

STUART

Stuart corresponding in weight to above grades in number of nuts to the lb. 5c per lb. less than Success.
